

ABOUT ME

Senior Product Designer with 3+ years shipping complex, research-driven products across gig-worker tools, delivery operations, and mobility solutions that move real business metrics. I pair user research with business outcomes, shipping work that lifted plan adoption from 10% to 35% and cut operational turnaround from days to minutes.

SKILLS

Design: Product Design, UX/UI, Interaction Design, Visual Design, Design Systems, Information Architecture, Prototyping

Research & Strategy: User Research, Usability Testing, Data-Informed Design, Product Thinking

Tools: Figma, FigJam, coded prototyping (Claude Code), AI-assisted design

WORK EXPERIENCE

Yulu: Sr. Product Designer

May 2025 - Present

- Designed an end-to-end incentive system for gig workers, using research to surface drop-off drivers and shipping rewards that increased **retention by 13%**.
- Redesigned the Quick Ride service from user research and ride data, restructuring the flow to drive cost savings that contributed to Yulu reaching **EBITDA profitability**.
- Rebuilt the battery-swap experience into a fully self-service flow for rental users, removing the need for station staff, **cutting operational cost** and **reaching 100% adoption**.
- Mentor** junior designers through design reviews, workshops, and 1:1s, raising design quality and consistency across the team.

Yulu: Product Designer

May 2023 - May 2025

- Conceptualised and launched 'Earn with Yulu', a gig-opportunity platform for delivery workers that grew their earnings and sustained a **99% order-fulfilment rate**.
- Built the app's first design system and information architecture, cutting design-to-dev **turnaround by 43%**.
- Redesigned rental-plan recommendations using research and usage data, lifting plan **adoption from 10% to 35%**, with continued growth.
- Architected a modular home-page system enabling dynamic, occasion-based updates without app releases, **reducing engineering dependency** for content changes.
- Created a self-serve coupon framework for business teams that **cut coupon creation from 7 days to 10 minutes**.
- Delivered a web app for inventory tracking and bike delivery/repair scheduling, reducing spare-parts **discrepancies from 30% to 5%**.

Yulu: Product Design Intern

December 2022 - May 2023

- Shipped a fleet-management web app with real-time monitoring and firmware updates, replacing manual SQL workflows and reaching **100% team adoption**.

Idealoft Studio: UX Designer - Internship

August 2022 - November 2022

- Designed an app for an Investment Advisory, enhancing user engagement and promoting features for investments.
- Crafted wireframes and developed UI elements, including banners and icons, for ICICI Instabiz and Kotak Boost projects, boosting engagement.

Ogee Studio: UX Designer - Internship

December 2021 - March 2022

- Conducted user & market research to build a comprehensive user journey map & low-fidelity wireframes.

EDUCATION

Vishwakarma University : Bachelor of Design (Product Design)

2019-2023
