ABOUT ME

A Product Designer with **3+ years of experience** specialising in crafting impactful designs that seamlessly merge research-driven insights with scalable and user-centered approaches. My design philosophy focuses on creating simple yet meaningful experiences that make life easier.

SKILLS

Product design, User Experience, User Research, Design system, Design Thinking, Problem Solving, Product Thinking, Empathy, Data-Driven Design, Strategic Design, Information Architecture, Prototyping, Visual Design, Design Tools

WORK EXPERIENCE

Yulu: Sr. Product Designer

May 2025 - Present

- Built an end-to-end incentive framework for gig workers which is **forecasted** to increase **retention by 13%**.
- Redesigned and optimised the quick ride service** backed by user research and data, driving **cost saving through tech** construct changes, **contributing to Yulu's EBITDA profitability**.
- Mentored** junior designers through design reviews, workshops, and one-on-one sessions, fostering skill growth and improving design quality across the team.

Yulu: Product Designer

May 2023 - May 2025

- Conceptualised and launched a platform 'Earn with Yulu' providing gig opportunities for delivery workers, boosting engagement with Yulu, maximising the user's income, and achieving a **99% order fulfilment rate**.
- Spearheaded the establishment of a robust **design system** and information architecture for the app aligning it with the company's vision, **reducing TAT by 43%** for the design and technology team.
- Drove enhancements of rental plan recommendations through extensive user research and data analysis, resulting in a significant **increase in plan adoption from 10% to 35%**, with continued growth.
- Established and designed a scalable system** for the home page to enable dynamic updates for special occasions without requiring an app release, enhancing efficiency and user experience.
- Created a dynamic coupon framework, which improved operational efficiency and customer service and **reduced coupon creation TAT from 7 days to 10 minutes**.
- Led the design of a web application for inventory tracking and bike delivery, repair, and maintenance scheduling, which optimised operations and inventory management, resulting in improved resource allocation reducing spare parts **discrepancies from 30% to an exceptional 5%**.

Yulu: Product Design Intern

December 2022 - May 2023

- Built and deployed a fleet web app with real-time monitoring and firmware update capabilities, eliminating manual SQL queries which enhanced fleet management efficiency, **achieving 100% rollout and adoption**.

Idealoft Studio: UX Designer - Internship

August 2022 - November 2022

- Designed an app for an Investment Advisory, enhancing user engagement and promoting features for investments.
- Crafted wireframes and developed UI elements, including banners and icons, for ICICI Instabiz and Kotak Boost projects, boosting engagement.

Ogee Studio: UX Designer - Internship

December 2021 - March 2022

- Conducted user & market research to build a comprehensive user journey map & low-fidelity wireframes.

EDUCATION

Vishwakarma University : Bachelor of Design (Product Design)

2019-2023
